Sélection des images

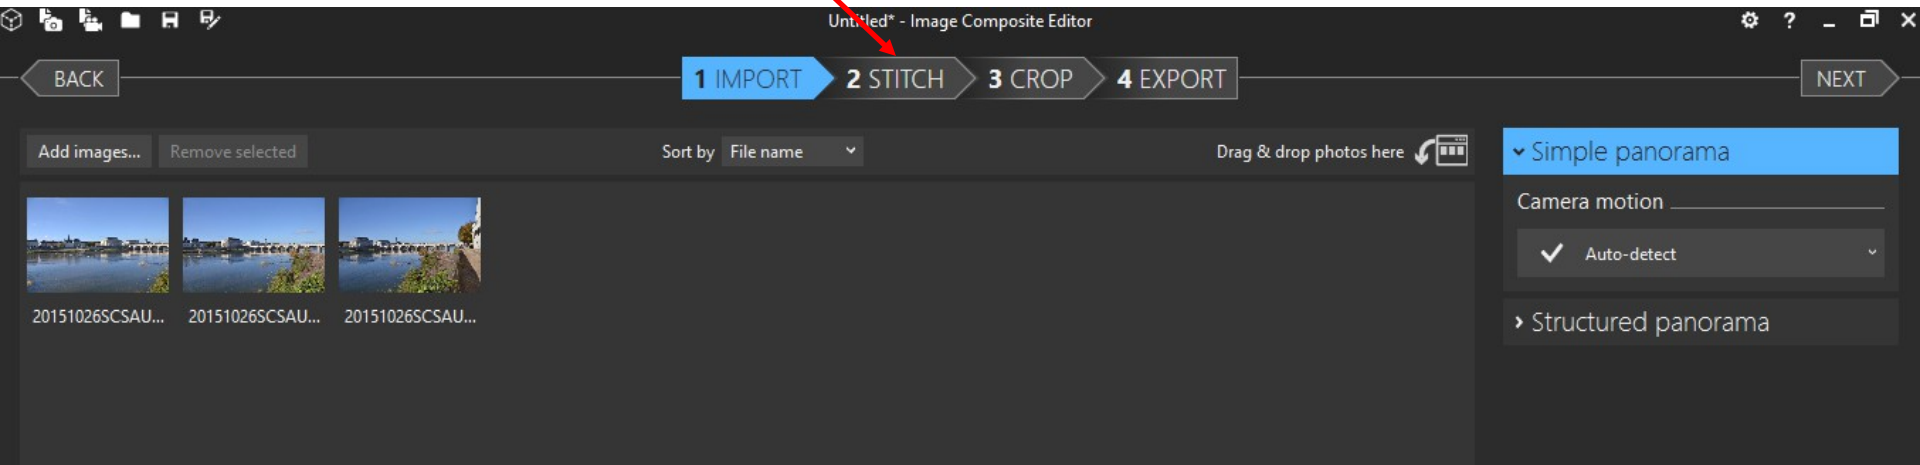

Appuyer sur « ouvrir »

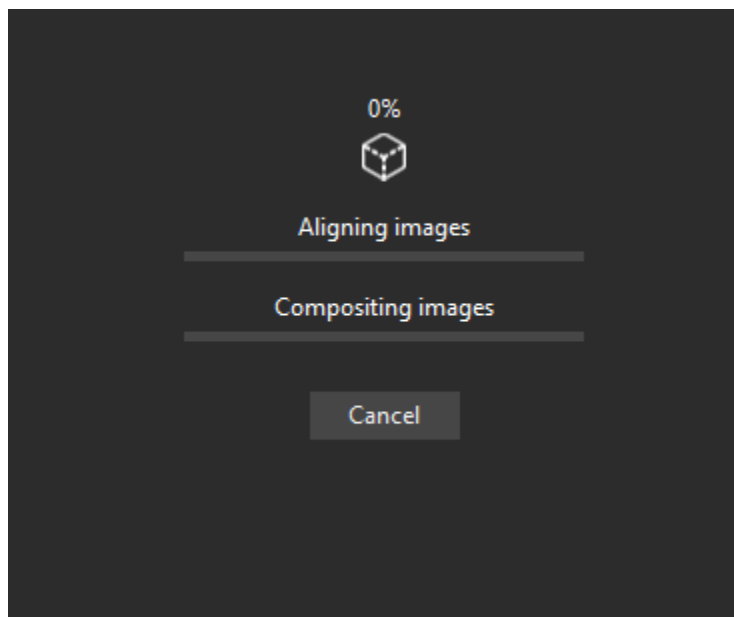

Les photos sont sélectionnées

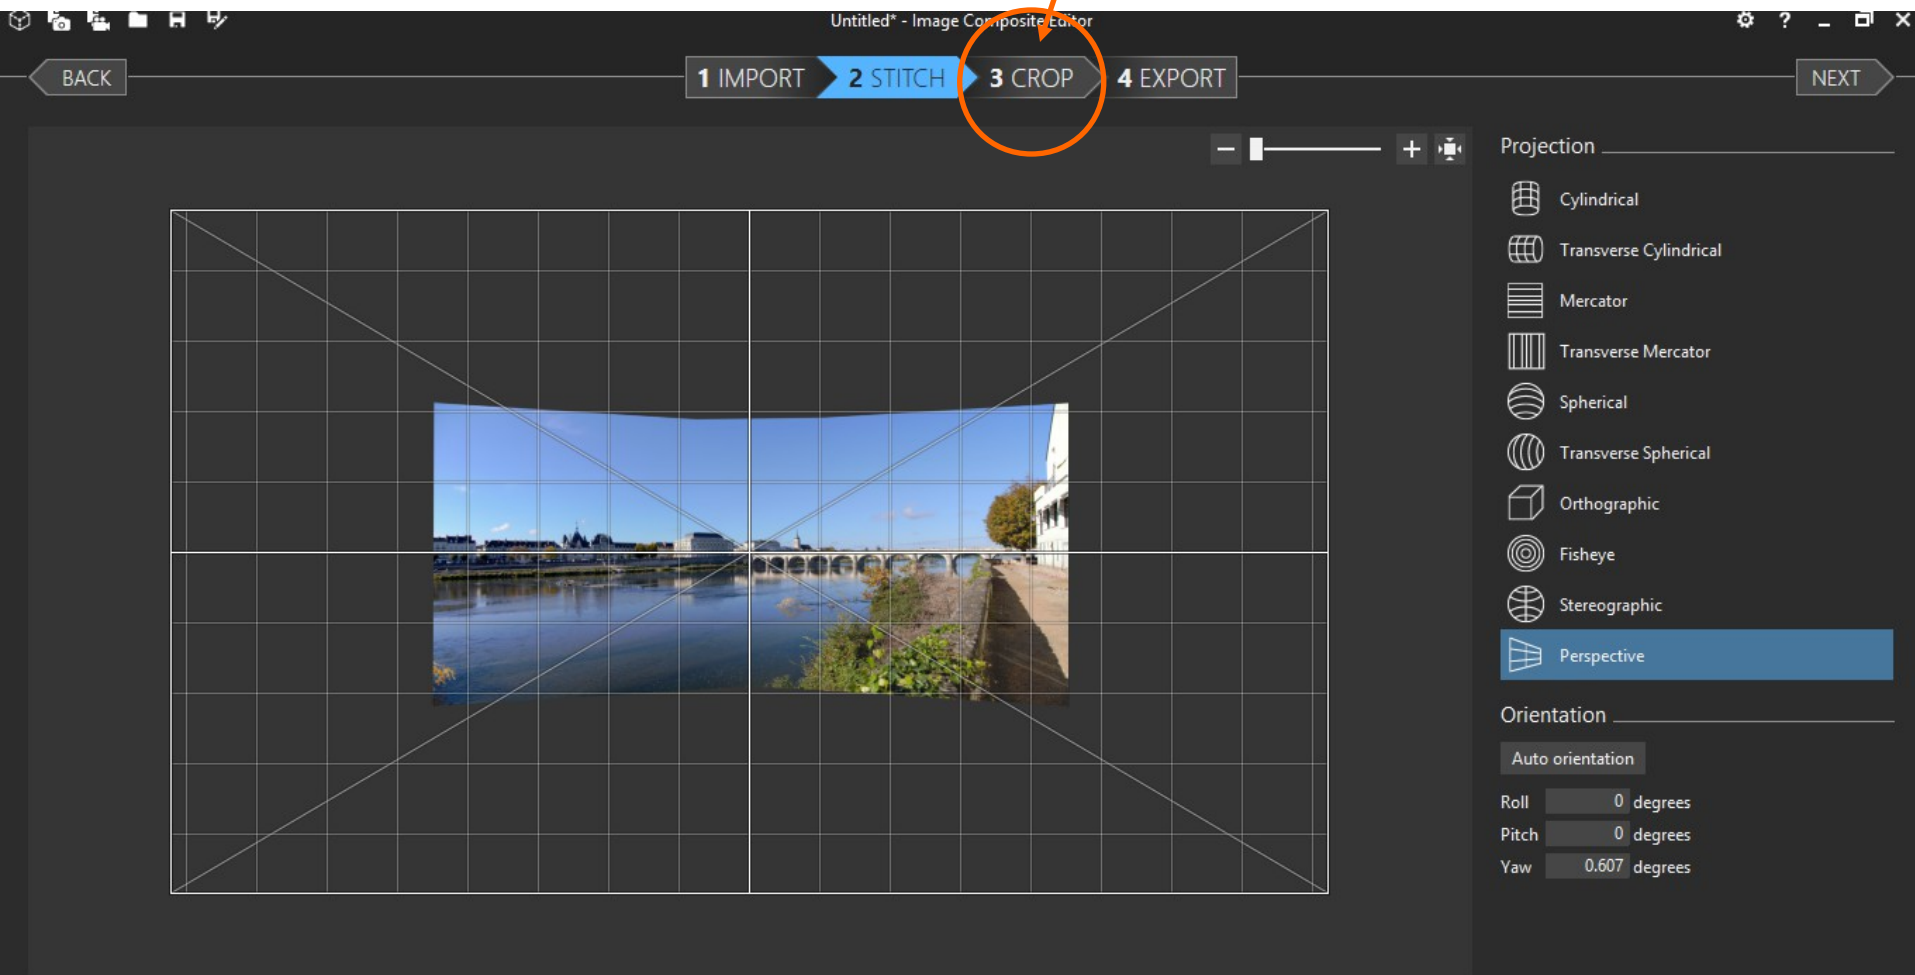

Passer à l'étape suivante « stitch »

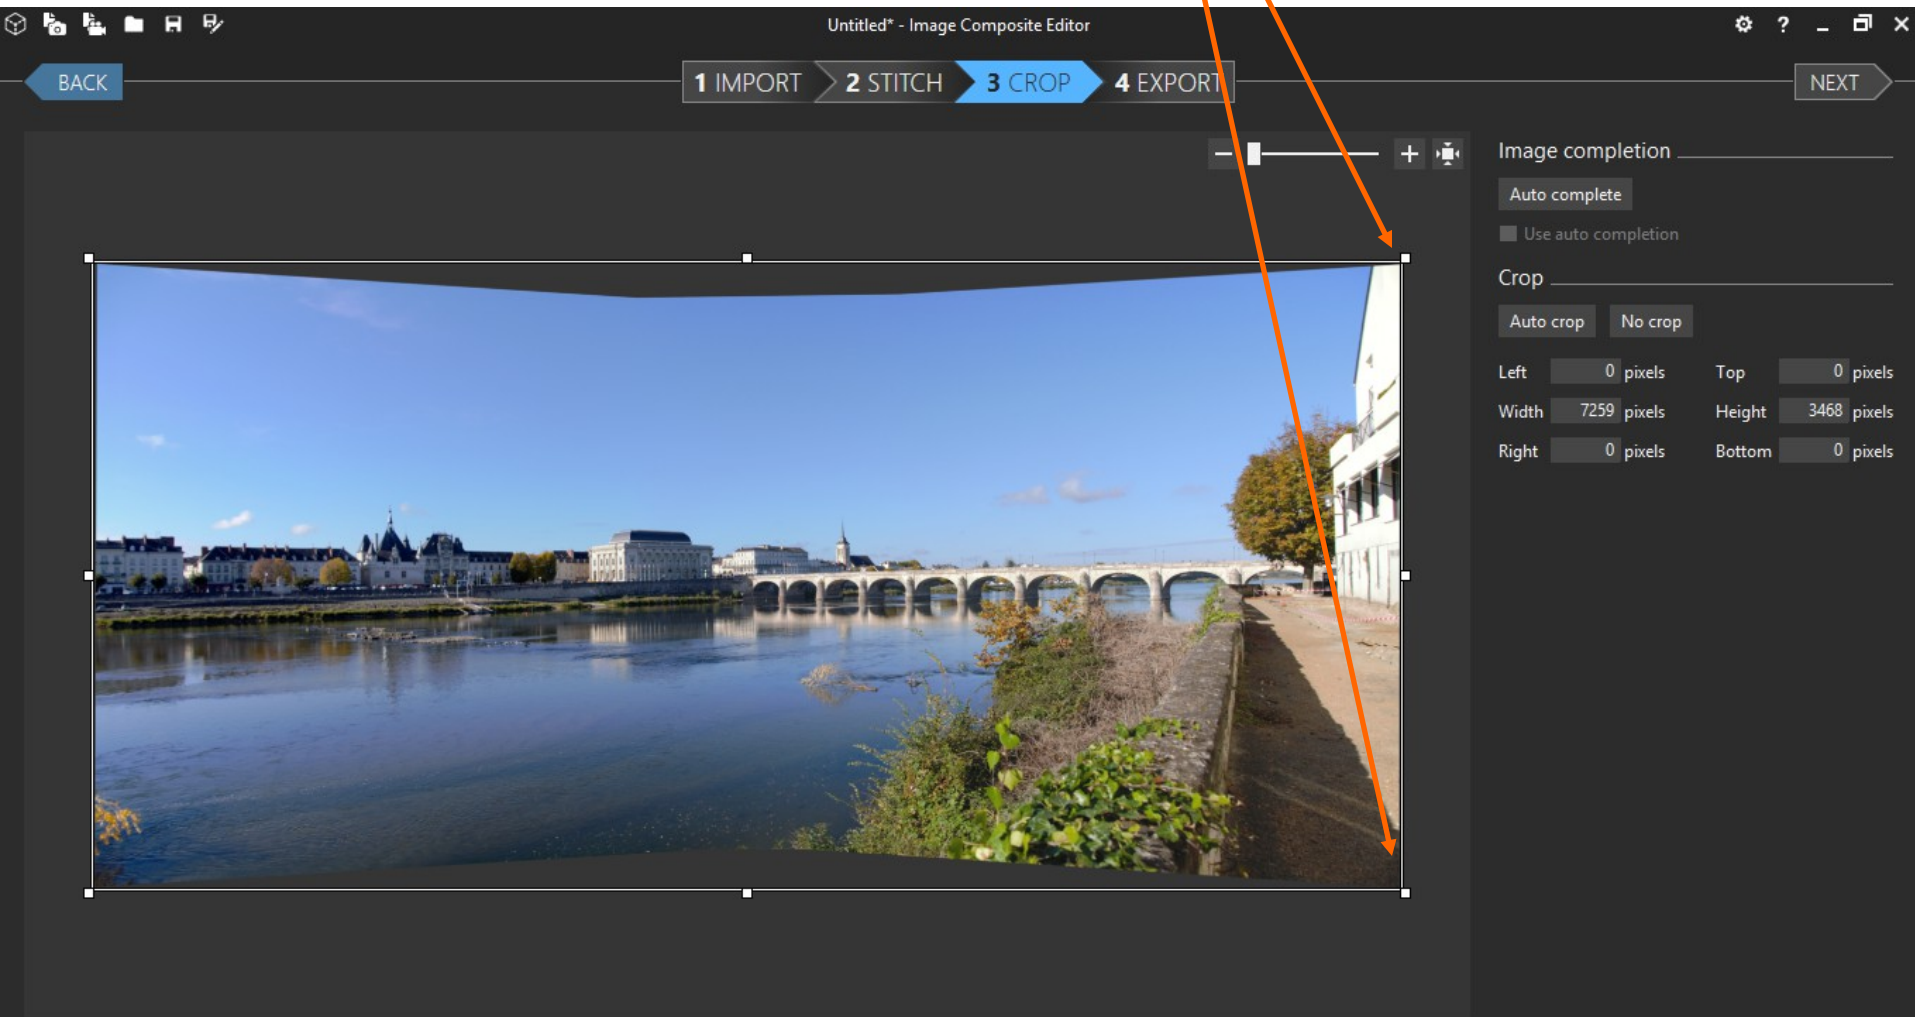

Laisser faire l'ordinateur

Passer à l'étape suivante « crop »

Voilà notre panorama, 2 possibilités :
1 - on peut le retailler avec les poignées

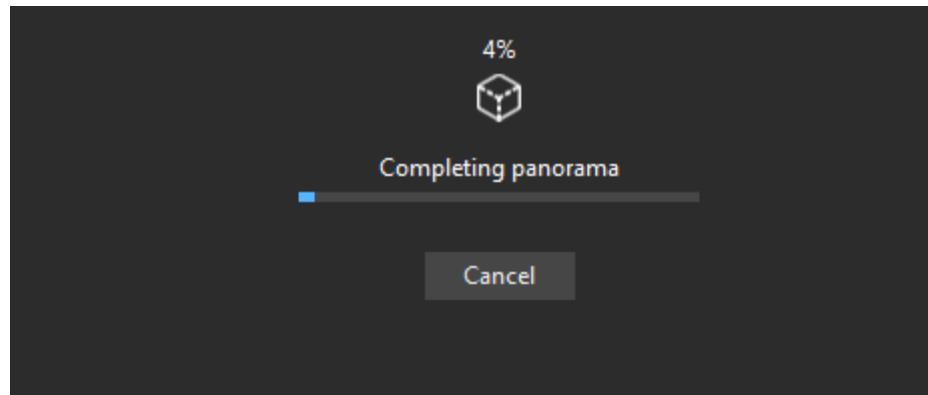

Voilà notre panorama, 2 possibilités :
2 - on utilise « auto complete » de préférence

The screenshot shows the 'Image Composite Editor' interface. At the top, the title bar reads 'Untitled* - Image Composite Editor'. Below it, a navigation bar contains four steps: '1 IMPORT', '2 STITCH', '3 CROP' (highlighted in blue), and '4 EXPORT'. To the left of the steps is a 'BACK' button, and to the right is a 'NEXT' button. The main workspace displays a panoramic photograph of a river with a multi-arched bridge in the background and buildings along the shore. The image is framed by a white border with corner handles. To the right of the workspace is a settings panel. The 'Image completion' section is active, showing an 'Auto complete' button and a checkbox labeled 'Use auto completion'. Below this is the 'Crop' section, which has 'Auto crop' and 'No crop' buttons. The 'Auto crop' button is selected. The crop settings are displayed as follows:

Left	0 pixels	Top	0 pixels
Width	7259 pixels	Height	3468 pixels
Right	0 pixels	Bottom	0 pixels

Laisser faire

Résultat définitif, passer à « export »
